

**AMENDMENTS TO THE SPECIFICATION:**

Please replace paragraph [0066] on page 17 with the following amended paragraph:

**[0066]** The inking system in Figure 7 includes a press-driven large or main form roller 308 and a clean-up roller 310, both of which contact the printing plate carried by the plate cylinder 302 to form a uniform film of ink on the image areas of the plate. A vibrator roller ~~312~~ 313 engages both the clean-up roller 310 and the form roller 308 as shown. The form roller 308 and the clean-up roller 310 have a resilient covering.

**AMENDMENTS TO THE DRAWINGS:**

Attached please find eight sheets of formal drawings of Figures 1-7 to replace the informal drawings filed with the application.

Also attached is an annotated sheet showing a change to Figure 7 to eliminate a duplicate number 312. A corresponding change has been made to the specification.

Respectfully submitted,

BURNS, DOANE, SWECKER & MATHIS, L.L.P.
